

To whom this may concern:I am a paying subscriber to XM Radio and I enjoy the privelage of being able to select what I like to listen to and when I want to listen. I am totally against any broadcasting association-government association-or any other party attempting to restrict any of my rights and /or freedoms in any way.The National Broadcasters Association have no right whatever to try to persuade any entity by any means to intrude upon these rights which I enjoy as part of being an AMERICAN.I have sent many complaints to the FCC regarding the porno and un-invited spam along with their virus laden attachments and have not seen any action on this matter.

I certainly expect that you will adhere to the rights that all Americans have and not just some special entity who try's to further erode the God given rights which we hold dear to us. To allow The National Broadcasters to create this type of action would to me ,mean that your orginazation which is supported by TAXPAYING Americans is condoning a MINORITY of SPECIAL INTERESTS groups to become DICTATORS and if I wanted to live under those conditions I would go to a Country that did not allow freedoms. Thank You for Standing against The Broadcadters attempts to control any media orginazation other than their own,and to please keep their greedy hands off and their nose out of things which they should not be involved in. Sincerly:

Vernon
